

SPORT LED

APPLICATION AREA

The high output SPORT LED family was developed for the illumination of gymnasiums and sports facilities. Thanks to its robust housing and wire guard, it is protected against physical impacts. The luminaire is available in Mini, Slim, Medium and Large versions, according to the required light levels and dimensions of the spaces to be lit.

BASE MATERIAL

Housing of the luminaire: steel sheet powder coated in white colour.

Diffuser: equipped with 110° beam angle opal PMMA optics.

INSTALLATION

The luminaires can be mounted onto ceilings.

OPTIONS

The luminaires are available with 30°, 60°, 80° beam angle optics.

Mini: ball-proof solution for small sized sport facilities.

Slim: recommended for the replacement of the obsolete 3x1500 mm fluorescent gym luminaires. The lighting fixtures are easy to install and can be mounted even on beams. The luminaires can be connected into one continuous line via the cable slots at both ends of the body.

Medium: recommended for the illumination of medium sized gymnasiums, for a maximum mounting height of 5-7m.

Large: high performance luminaire, recommended for the illumination of large sports hall. Can be installed at up to 8-11m height.
