

SIMOTRADE

Slim LED Line
Trunking system

Slim LED Line is state-of-the-art technology itself.

Utterly versatile. Highly effective. Extremely simple.

Versatility: surface and suspended trunking system designed not only for industrial facilities, assembly and storage halls, but also for retail stores. When intended for retail outlet lighting, it can be ordered with spots or even with asymmetric wall washer optics.

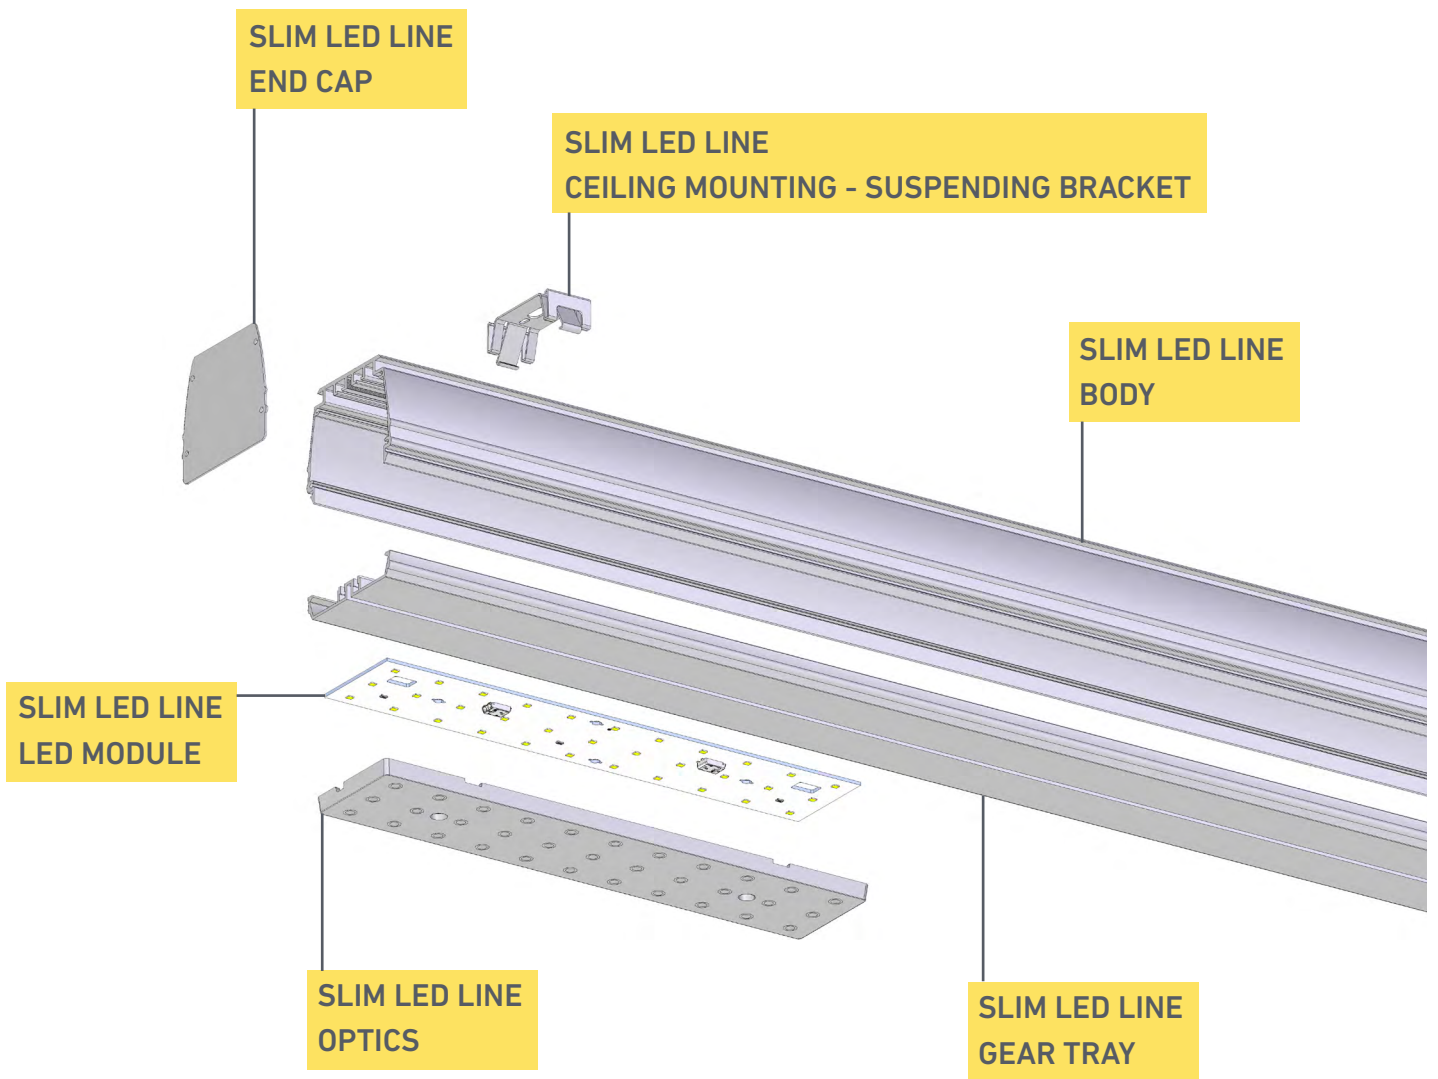

Efficacy: the energy efficient family boasts with high efficacy and resilience, and high transmittance PMMA lenses for perfect illumination. IP40 degree of protection with 12,200 lm output and 140 lm/W.

Simplicity: no-tool assembly with 3-phase wiring (7 wires) and quick connectors for fast installation.

powered by

TRIDONIC

Slim LED Line can be fitted with addressed safety lighting system, or with uninterruptable battery driver, as per request. The luminaires are available with occupancy and light sensor, or with wireless, addressable DALI control system, allowing for appointing individual sectors later.

Slim LED Line features 4000K, CRI>80 luminaires with 5 years' warranty for peace of mind. CRI>90, 3000K and emergency versions are available for order, together with 60, 90, and 120 degree angle options.
